Mu5ic

A Virtual Rehersal Room Platform

What is Mu5ic?

Mu5ic is an Italian app for distance music performance that can operate with an extremely low latency and an affordable price

How does it works?

It runs on Mac and Windows operating systems on computers and Iphone/IPad. It doesn't run on Android device at the moment due the the poor audio implementation of Android.

What is needed?

Mu5ic is in a beta testing stage and it needs:

1) a fast 5G internet speed connection
2) a LAN/ethernet cable (No WiFi)
3) a dedicated dongle the can be purchased for 10 euros (after testing the internet speed)

PROS & CONS

PROS:

- ultra low latency
- great sound stability (no jitter, no sound artifacts, no sound interruption)
- affordable price
- no monthly payment plans (you only pay the dongle)
- simple to use
- multiplatform (MAC, WIN, MAC portable)

CONS:

- only mono (no stereo)
- no panning
- no video support
- no fx (reverb, eq, compressor etc)
- no high quality sound (the sound is very compressed)

Distance Music Performance Showcase

Milan — Palermo

1.468,72 km

very good performance,no latency, no jitter or audio artifacts

Piano Keyboard = Davide Campione (Palermo)

Drums Keyboard = Giuseppe Vasapolli (Milan)
