

Thursday 21st September in Leuven

9:30 – 12:30

Pre-conference Workshop II

Opening Doors on the Future: Imagining art education in 2045, a hands-on workshop by the FAST45 Project

In 2045, the world as we know it today will look very different. While we cannot accurately predict what lies ahead, we can help shape it. [The FAST45 \(Future Art School Trends 2045\) project](#) workshop embraces the

immense potential of creativity and imaginative thinking fostered in art schools. Join us in this *future-thinking* workshop where we delve into four captivating and speculative scenarios for higher arts education, immersing ourselves in the possibilities of tomorrow. We will compare our impressions from these thought-provoking scenarios to the work we are already engaged in today. Brace yourself for a speculative adventure that bridges the gap between the familiar

present and the enigmatic unknowns of the future. Together, we will embark on a conjectural journey to help shape the world of higher arts education for generations to come!

The workshop will be facilitated by Sandrine Desmurs (CEFEDM Lyon), Koenraad Hinnekint (LUCA School of Arts) and Sara Primiterra (AEC office).
