Can knowledge of advanced rhythms help the communication in a jazzgroup

A course that deals with the tradition and the more modern / advanced

Thoughts

Rhythm has a need to be articulated in order to be understood

The interaction between the musicians in a jazzgroup is based on knowledge and understanding.

How do we relate to each other when we play together?

The communication is an instant process

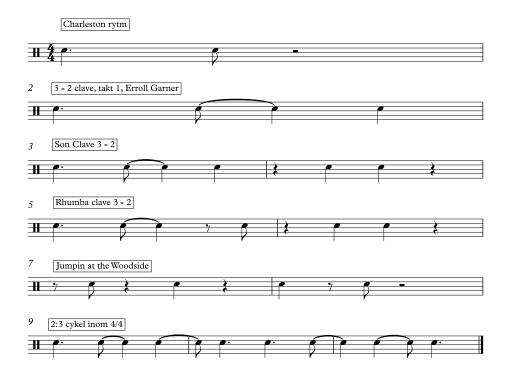

The more we know about rhythmical structures in most cases help us being well equipped for our communication

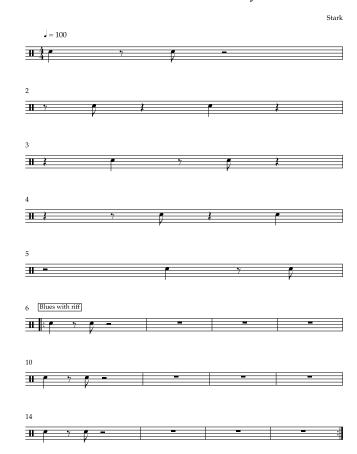

The challenge here is to be able to both play and listen at the same time

Basic rhythms
