# A Collaborative Effort

A collaborative effort to build a joint national vision for Finnish music education for 2030 embarked in April 2019.

All levels of music education and a wide range of actors in the field are engaged in the mission.

The work is about to come to a conclusion; the vision will be published in December 2020.

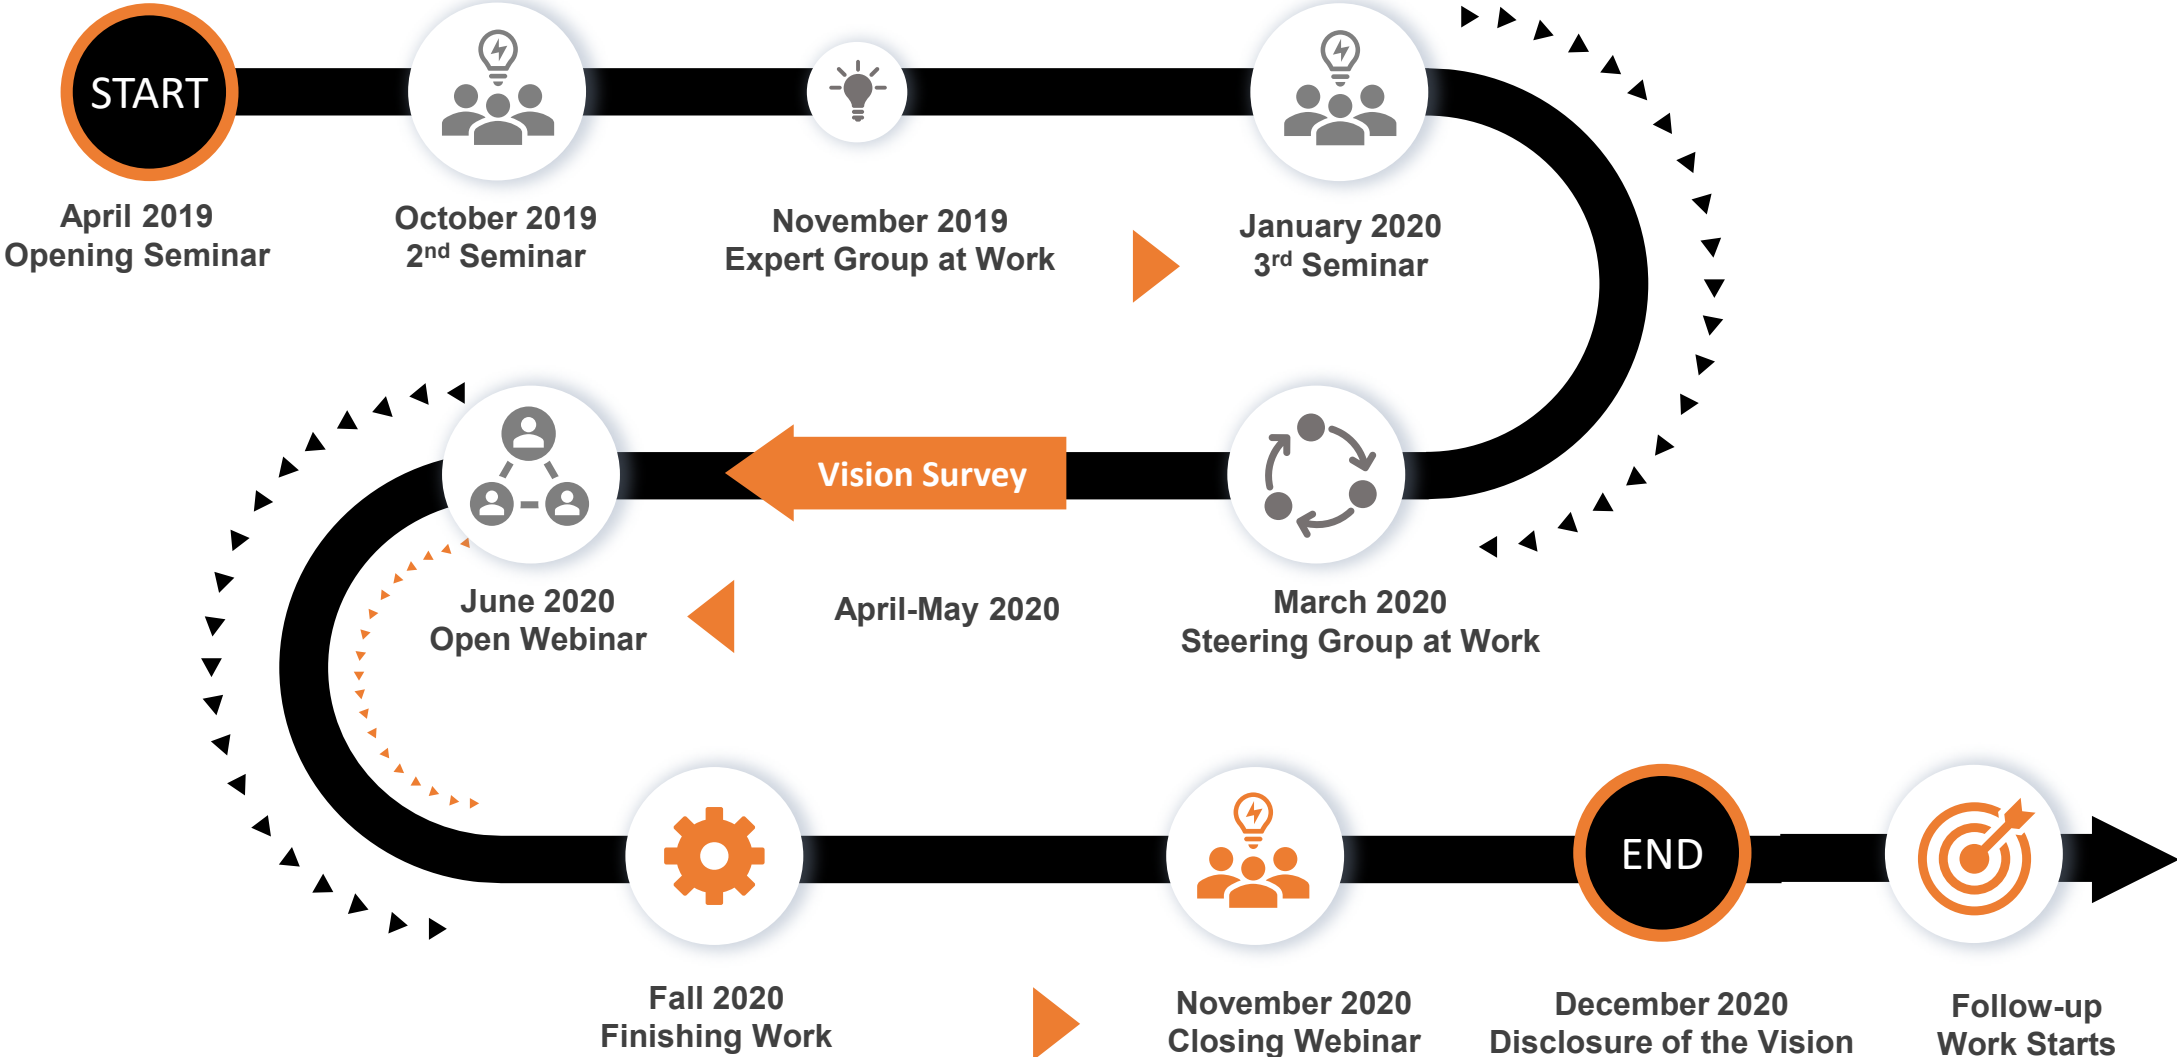

# Aims

To support local and national decision-making and strategy work in three ways:

1. Describe development goals for the national music education system
2. Clarify roles and responsibilities of the different actors in the field
3. Strengthen opportunities for cooperation on all levels
